Part I

Today Egon von Greyerz sent King World News one of the most important charts you will ever see. Greyerz, who is founder and managing partner at Matterhorn Asset Management, demonstrated, in this one chart, the incredible danger facing the global financial system and why gold will explode higher in price.

This is the first of two interviews KWN will be releasing with Greyerz today. Here is what Greyerz had this to say in Part I, along with his chart: "If I look around the world, the problems continue. China has yet another round of QE totaling \$60 billion. China is under real pressure. And if you look at ArcelorMittal, which is the biggest steel producer in the world, and for them China is a massive market, they had a 20% decline in sales in Q3."
