

# How much gold do China and the West really possess?

written by Edward Maas | May 25, 2015

**King World News weekly – May 21, 2015**

**Egon von Greyerz:** “Investors worldwide are sitting with assets inside of giant financial bubbles. We are talking about a \$250 trillion bubble in stocks, bonds and property. The size of the bubble has increased from \$150 trillion to \$250 trillion in the last 15 years. That’s a staggering 66 percent increase. We talked last week about how the \$100 trillion bond bubble will soon start to implode. We’ve seen bond yields start to surge in the last few weeks, led by the German 10-year....

**In this interview:**

- 70’s and 80’s bond yields revisited
- The Great Reset
- Eastern Countries realise something is coming
- How much Gold
